OIL AND GAS INSPECTION SERVICES

EXPERIENCED INSPECTORS FOR THE SAFE AND RELIABLE OIL SANDS PROJECTS

ABOUT DILIGENT...

Diligent is a **COR Certified** full-service provider of construction and plant inspections. Proud member of Alberta Construction Safety Association (ACSA), Canqual and PICS etc..

Our safety programs reviewed and accepted by third party contractor pre-qualification teams. We are strategically located at the heart of Oil Sands town in Fort McMurray. This is enabling us to act swiftly to the client's requirement. Currently providing our services to many projects/shops in and around Fort McMurray. With current equipment and professional team we are anticipating adding further shops and projects.

VISION, MISSION AND VALUES

At Diligent, Mission, Vision and Values are not just words. They are the administrative ideologies that have made Diligent a leader in the markets we serve. They are the fundamental beliefs that will lead us to continued success.

OUR VISION : To be the Centre of excellence in the Plant inspection, integrity services in the Alberta Oil Sands.

OUR MISSION : To safely deliver any project, any time, in any environment for the benefit of our customers, shareholders, employees and the communities.

OUR VALUES :

-  Uncompromising commitment to Quality, Health, Safety and Environment
-  An open relationship with our employees based on mutual trust, respect and success
-  Transparency, Accountability and Discipline in our business
-  Integrity in all we do

QUALITY MATTERS...

THIRD PARTY INSPECTION AND VENDOR AUDITS

Diligent offers third-party inspection services and has various registrations with internationally recognized entities, confirms verification and inspection services to one or more internationally recognized codes, standards, design specifications and specific technical project requirements.

Our source inspection services at supplier and vendor sites for manufacturers, owners and other shareholders verify that the equipment or goods have been manufactured in accordance with a client's specifications and other applicable quality system requirements as specified.

Source inspections are customized to meet a specific need and may include:

-  Product Certification
-  Review of material test reports
-  Witnessing mechanical tests, factory acceptance tests and hydrostatic and performance tests
-  Witnessing welder's performance qualifications
-  Witnessing NDE and performing visual examinations
-  Review of weld procedure specifications and procedure qualifications
-  Examination of edge preparation, fit-up and dimensional attributes
-  Inspection of coatings
-  Verification of quantities shipped, including proper packing and identification marking

QUALITY ASSURANCE AND DOCUMENTATION MANAGEMENT

We apply a systematic approach to ensure that the Vendor or Fabricator maintains a level of Quality Assurance and Quality Control to meet the job requirements with Client's requirements, and the Vendor or Fabricators own Quality Assurance and Quality Control Manual are both separately and jointly reviewed to ensure that the Vendor's plan meets job specification requirements. Qualified personnel then monitor the Vendor's application of their Quality Assurance / Quality Control Manual and/or plan to ensure compliance.

Through its manpower resources, **Diligent** has the capability to support the Quality Assurance / Quality Control function of project management teams. On projects, the management contractor may not have the necessary expertise available or may not wish to recruit personnel to specifically fulfill the Quality Assurance and Quality Control role. We can help in a number of ways, by assuming the role of Quality Assurance and Quality Control managers or by seconding specialist inspection personnel to an existing Quality Assurance and Quality Control team. These services can be provided during design, procurement and manufacture and/or during site fabrication, installation and commissioning.

YOUR IN-PLANT INSPECTION PARTNER

Diligent wants to assist you with all of your fixed equipment inspection programs. From program assessment and management system development to specialized engineering analyses, we can assess where you are and then help position you to where you want to be - reliability, availability, maintainability and operability to support profitability.
